

The Use Of Disco Equipment In The Hall

In order to prevent damage to the floor –

Please carry all equipment into the hall.

It must not be dragged or rolled into position.

Wires must not be taped down to the floor as this lifts the varnish and the polish, but you must ensure that wires are not a trip hazard.

We have a PA system which has blue tooth connectivity, please ask if you would like to use it when you are shown round.

Please ensure no wires should cross the fire exit door and no equipment obstructs the fire exit door in any way.

Noise levels must be kept within the legal limits and please ensure noise level checks are made.

Damage to the floor will be charged at a standard rate of £20.
